Entry, exit and site safety

Version 1.0 | Effective November 1-30, 2026 | Fictional test content

1. Arriving and parking

Before reaching the barrier

Check the facility code, vehicle plate and booking interval on the confirmation. Entry is available only during the reserved interval and within 06:00-22:00. Early arrivals must wait outside the lot without blocking public access.

Opening the barrier

Present the confirmation QR code to the reader. If the reader fails, use the intercom and provide the reservation ID and plate. Do not follow another vehicle through an open barrier. Each vehicle must complete its own entry check.

Finding the space

Follow the marked route at no more than 10 km/h and park wholly within the assigned bay. If another vehicle occupies it, use the waiting area and contact support. Never block an emergency route while resolving a booking problem.

Version 1.0 | Effective November 1-30, 2026 | Fictional test content

2. During the stay

Pedestrian movement

Use marked walkways and keep children close. Drivers yield to pedestrians and exiting vehicles. Accessible transfer aisles are not waiting areas, luggage zones or motorcycle spaces.

Repeat entry

The same booked vehicle may exit and re-enter during its reserved interval. Re-entry does not extend the end time, and the reservation cannot be shared with a second vehicle. Keep the QR code private.

Incidents

For immediate danger, move to a safe place and contact local emergency services. Notify site support once safe. Do not attempt repairs to barriers, electrical equipment or charging sockets. Report damaged equipment through the intercom.

3. Departure and assistance

Leaving on time

Exit by the reservation end time. No grace period is guaranteed. Request a whole-hour extension before the original end time if needed; it must be confirmed and cannot run beyond 22:00.

Overstay handling

An unapproved overstay may block the next customer. Contact support immediately; any additional parking is charged at the booked space's hourly rate per started hour. This charge does not grant permission to remain or guarantee access after closing.

Barrier failure or late exit

Use the intercom if the exit barrier fails. If unable to leave by 22:00, contact support before closing to arrange assistance. There is no scheduled overnight access service. Never force a barrier or drive through a pedestrian gate.
