Airport Approach - facility guide

Version 1.0 | Effective November 1-30, 2026 | Fictional test content

1. Location and arrival

Facility identity

Northgate Parking operates Airport Approach, facility code AIR, in the airport business district. The fictional address is 42 Test Aviation Lane, Warsaw. Use facility code AIR when contacting support or checking a reservation. All addresses and facilities in this corpus are invented for testing.

Vehicle entrance

Approach using Test Aviation Lane via the business park junction. Look for the orange barrier beside reception 42. The vehicle entrance and exit share a barrier lane; arriving drivers yield to exiting vehicles. A reservation for another Northgate facility does not open this barrier.

Opening hours

Vehicle entry and exit are available daily from 06:00 until 22:00 throughout November 2026, including weekends and November 1 and 11. Bookings must start at or after 06:00 and end by 22:00 on the same day. Overnight parking is not offered.

Walking connections

This is an off-airport mock facility. No terminal shuttle is provided; arrange onward transport separately.

2. Spaces, prices and vehicle limits

Space inventory

Airport Approach has 12 numbered spaces: AIR-001 to AIR-006 are standard; AIR-007 and AIR-008 are electric; AIR-009 and AIR-010 are accessible; AIR-011 and AIR-012 are van spaces. Space identifiers are unique across facilities.

Hourly parking prices

Standard and accessible spaces cost PLN 5.00 per hour. Electric and van spaces cost PLN 7.00 per hour. These are final mock prices with taxes included. Charging energy is separate from the electric-space parking price. There is no daily cap or overnight rate.

Dimensions and clearance

Standard and electric vehicles may be at most 5.0 m long, 2.0 m wide and 2.0 m high. Accessible spaces allow 5.0 m length, 2.1 m width and 2.0 m height. Van spaces allow 6.0 m length, 2.2 m width and 2.8 m height. Width includes mirrors; height includes roof attachments. Maximum gross vehicle mass is 3,500 kg in every space.

On-site equipment

The surface lot has lighting, marked pedestrian routes, an entrance intercom and two 11 kW Type 2 AC charging sockets. Bring a compatible charging cable. Accessible spaces have a marked transfer aisle that must remain clear. There is no staffed vehicle storage or luggage service.

3. Using your booking

Entry and identification

Check that your confirmation names Airport Approach and the correct registration plate. At the barrier, present the booking QR code or use the intercom with the reservation ID. Follow signs to your assigned space. A QR code is valid only during the reserved interval.

If the space is occupied

Stop in the signed waiting area and contact support using the intercom. Do not take an accessible or electric space as a substitute. Support may offer an equivalent space at the same facility; a relocation requires confirmation before you move.

Departure and delays

Leave the assigned space and exit before the reservation end time. Request any extension before the original end time; approval depends on the next booking and the 22:00 closure. There is no automatic extension or free overstay period.

Support and related policies

For mock customer support use help@northgate.example, quoting facility AIR, your reservation ID and the issue. Support hours are 06:00-22:00 daily. For details consult Booking policy, Cancellation and refunds, Vehicle size rules, and Entry, exit and site safety. In an immediate emergency, contact local emergency services first.
