2. Calculating the charge

Booked parking

The parking charge is the hourly rate multiplied by the number of booked whole hours. The minimum stay is one hour. A three-hour standard visit at Station East costs PLN 21.00. A four-hour van visit at Airport Approach costs PLN 28.00.

Electric charging

Electric-space parking is charged at its listed hourly rate whether charging is continuous or intermittent. Consumed energy costs an additional PLN 1.80 per kWh, measured by the charger. Energy use is not included in the parking database's hourly_price field.

Changes and additional time

A confirmed extension uses the same space's hourly price. Changing facility or space type recalculates the price for the accepted replacement. Unapproved overstays are charged per started extra hour but do not create a right to stay.

3. Payment and receipts

Payment confirmation

The mock booking service accepts card payment before confirming a reservation. No cash collection is offered at the barrier. A declined or abandoned payment does not confirm a space; retry through the booking service.

Receipts and support

Request a receipt using the reservation ID and the booking contact details. For an incorrect charge, contact help@northgate.example with the facility, booking interval and disputed amount. Never send a full card number or security code.

Sample-system limits

The companion SQLite database stores hourly prices and reservation details but does not include payment transactions, refunds, charging sessions or billing identity. Treat the examples here as static policy facts, not evidence that a payment actually occurred.
